

Caterpillar® 3516B High Displacement Engine Upgrade

The Difference Is Less Fuel Consumption And Lower Cost Per Ton

Spend Less Every Ton

With the Cat® 3516B High Displacement (HD) Engine upgrade for Cat 793B and 793C Mining Trucks, you can expect significant savings in fuel, extended repair intervals and reduced cost per ton.

Get More Every Hour

The Cat 3516B HD gets its improved performance from a 13% increase in displacement, compared to previous standard-stroke engines.

Exceed Expectations Every Day

The Cat 3516B HD uses the latest technology available to exceed original-engine performance. It's all part of our long-term commitment to help you make the most of every ton, every hour, every day.

Caterpillar. The Difference Counts.™

Cat Dealers define world-class product support. We offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts keeps your entire fleet up and running to maximize your equipment investments.

CATERPILLAR®

Caterpillar 3516B High Displacement Engine Upgrade

In addition to new Cat equipment and replacement parts, your Cat Dealer offers a variety of options, including Cat Reman, high-quality overhauls and repair services.

Fuel Consumption Improvement*

Hours-to-overhaul Improvement*

* Performance may vary, depending on application, load factors and other variables.

Upgrade Your Expectations

The Cat 3516B High Displacement Engine upgrade delivers substantial savings by using less fuel, extending time between repairs, and lowering your overall cost per ton. Owners of Cat 793B and 793C Mining Trucks can upgrade their equipment by purchasing an HD Reman engine and conversion parts package, and returning their old 3516 short-stroke engines. In return, they get:

Features

- 13% more displacement
- New turbos
- Extended repair and maintenance intervals

Benefits

- Significantly less fuel consumption
- Better response
- Lower repair and maintenance costs, and lower cost per ton
